

Unlocking Australia's Soil Potential

Bio-Nema-Key+

Product Information & Safety Data

Intended Use: Soil Nematode Suppression

Product Type: Agricultural Biological Farming Aid

Microbial Consortium (Dormant Micro-organisms 5 x 10⁹ CFU/g):

Bacillus licheniformis, *Bacillus subtilis*, *Bacillus thuringiensis*, *Bacillus megaterium*, *Bacillus amyloliquefaciens*, *Bacillus pumilus*, *Pseudomonas fluorescens*, *Azotobacter chroococcum*, *Bacillus clausii*, *Bacillus coagulans*

Bio-Nema-Key+ is a biologically active microbial formulation designed to suppress plant-parasitic nematodes in the soil, including *Meloidogyne* (root-knot), *Pratylenchus* (lesion), and *Heterodera* (cyst) nematodes. The diverse microbial blend works through a combination of mechanisms: direct antagonism, competitive exclusion, metabolite toxicity, and enhancement of plant root defences.

✓ *Bacillus subtilis*, *B. amyloliquefaciens*, *B. pumilus*, *B. licheniformis*

- Produce nematicidal lipopeptides and enzymes (e.g., chitinases, proteases) that degrade nematode eggs and cuticles.
- Colonise the root zone to form a protective microbial barrier against nematode intrusion.
- Induce systemic resistance (ISR) in host plants, priming roots for nematode attack resistance.

✓ *Bacillus thuringiensis*

- Produces crystal (Cry) proteins and exotoxins with nematicidal activity.
- Disrupts feeding and reproduction in nematodes, particularly juvenile stages.

✓ *Pseudomonas fluorescens*

- Known to suppress nematode egg hatching and reduce gall formation in infected roots.
- Produces hydrogen cyanide (HCN) and secondary metabolites that are toxic to nematodes.

✓ *Azotobacter chroococcum*

- Fixes nitrogen and boosts plant root vigour, making plants less susceptible to nematode stress.
- Enhances microbial competition in the rhizosphere.

✓ *Bacillus clausii* & *Bacillus coagulans*

- Support microbial resilience and stability in soil.
- Compete with pathogens and support long-term colonisation by beneficial microbes.

✓ *Bacillus megaterium*

- Enhances phosphorus availability and root development, indirectly mitigating nematode impact by promoting root regeneration.

Application Benefit Summary:

- Suppresses plant-parasitic nematode populations in soil.
- Reduces root damage and gall formation.
- Strengthens root health and plant tolerance to nematode stress.
- Enhances nutrient availability and root zone microbial balance.

Bio-Nema-Key+

1. IDENTIFICATION:

GHS Product Identifier

Product Name: Bio-Lepti-Key

Product Number: Bio-Lepti-Key

Other Means of Identification

Agricultural and Horticultural use as a plant growth enhancer

Recommended Use of The Chemical and Restrictions on Use

Agricultural and Horticultural use as a plant growth enhancer

Supplier's Details

Product Name: Sirenco Australia T/A Fertikey

Address: 338 Redhill farms road,
Gin Gin, QLD,
4671

Telephone: +61 461 514 791

Emergency Phone Number: +61 461 514 791

2. HAZARD IDENTIFICATION:

General Hazard Statement

Not classified, the classification criteria are not met.

GHS Classification in Accordance with: OSHA (29 CFR 1910.1200)

Not a hazardous substance or mixture.

Unlocking Australia's Soil Potential

Bio-Nema-Key+

2. HAZARD IDENTIFICATION (CONTINUED):

GHS Label Elements, Including Precautionary Statements

Not a hazardous substance or mixture.

Other Hazards Which Do Not Result in Classification

Not a hazardous substance or mixture.

3. COMPOSITION/INFORMATION ON INGREDIENTS:

Substances/Components

Component	CAS Registry No	Weight (g)	% of Product
<i>Bacillus licheniformis</i>	68038-66-4	0.5 g	0.25%
<i>Bacillus subtilis</i>	68038-70-0	5.5 g	2.75%
<i>Bacillus amyloliquefaciens</i>	68038-60-8	4.5 g	2.25%
<i>Pseudomonas fluorescens</i>	68332-93-4	0.5 g	0.25%
<i>Bacillus pumilus</i>	1383428-50-9	0.5 g	0.25%
<i>Bacillus megaterium</i>	68038-67-5	0.5 g	0.25%
<i>Bacillus thuringiensis</i>	68038-71-1	0.5 g	0.25%
<i>Bacillus clausii</i>	Not available	0.5 g	0.25%
<i>Bacillus coagulans</i>	68038-65-3	0.5 g	0.25%
<i>Azotobacter chroococcum</i>	68038-58-4	0.5 g	0.25%
Maltodextrin	9050-36-6	184.0 g	92.0%
Food grade proprietary colour blend	Not available	2.0 g	1.0%

4. FIRST-AID MEASURES:

Description of Necessary First-aid Measures

General Advice:	Consult a physician. Show this safety data sheet to the doctor in attendance.
If inhaled:	Move to fresh air. Keep the patient warm and at rest. If symptoms persist, call a physician.
In case of skin contact:	Wash off thoroughly with plenty of soap and water, if available with polyethylene glycol 400, and subsequently rinse with water. If symptoms persist, call a physician.
In case of eye contact:	Wash off immediately with plenty of water for at least 15 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eyes. Get medical attention if irritation develops and persists.
If swallowed:	Never give anything by mouth to an unconscious person. Rinse mouth with water. Consult a physician.
Personal protective equipment for first-aid responders:	None

Most Important Symptoms/eEffects, Acute and Delayed

No symptoms known or expected.

Indication of Immediate Medical Attention and Special Treatment Needed, if Necessary

Treat symptomatically. There is no specific antidote.

Unlocking Australia's Soil Potential

Bio-Nema-Key+

5. FIRE-FIGHTING MEASURES:

Suitable Extinguishing Media

Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

Specific Hazards Arising From The Chemical

Dangerous gasses are evolved in the event of a fire.

Special Protective Actions For Fire-fighters

Wear self-contained breathing apparatus for firefighting if necessary.

Further Information

Contain the spread of firefighting media. Do not allow run-off from firefighting to enter drains or water courses.

6. ACCIDENTAL RELEASE MEASURES:

Personal Precautions, Protective Equipment and Emergency Procedures

Avoid dust formation. Avoid breathing vapours, mist or gas. For personal protection see section 8. EXPOSURE CONTROLS/PERSONAL PROTECTION.

Environmental Precautions

Should not be released into the environment. See section 12. ECOLOGICAL INFORMATION for additional ecological information.

Methods and Materials for Containment and Cleaning Up

Sweep up and shovel. Keep in suitable, closed containers for disposal.
Clean with disinfectants.

Unlocking Australia's Soil Potential

Bio-Nema-Key+

6. ACCIDENTAL RELEASE MEASURES (CONTINUED):

Reference to Other Sections

Information regarding safe handling, see Section 7. HANDLING AND STORAGE.

Information regarding personal protective equipment, see Section 8. EXPOSURE CONTROLS/PERSONAL PROTECTION.

Information regarding waste disposal, see Section 13. DISPOSABLE CONSIDERATIONS.

7. HANDLING AND STORAGE:

Precautions for Safe Handling

No specific precautions required when handling unopened packs/containers; follow relevant manual handling advice.

Ensure adequate ventilation.

Conditions for Safe Storage, Including any Incompatibilities

Store in a place accessible by authorised persons only. Store in original container. Keep containers tightly closed in a dry, cool and well-ventilated place. Keep away from direct sunlight. Protect from frost. Keep away from food, drink and animal feed.

Specific end Use(s)

Keep away from food, drink and animal feeding stuffs.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION:

Appropriate Engineering Controls

None required

Unlocking Australia's Soil Potential

Bio-Nema-Key+

8. EXPOSURE CONTROLS/PERSONAL PROTECTION (CONTINUED):

Individual Protection Measures, Such as Personal Protective Equipment (PPE):

Pictograms:

Eye/Face Protection

Safety Glasses

Skin Protection

Nitrile Gloves

Body Protection

Refer to COSHH assessment (Control of Substances and Hazardous to Health (Amendment) Regulations 2004.)

Engineering controls should be used in preference to personal protective equipment whenever practicable. Refer also to COSHH Essentials.

Personal Protective Equipment

In normal use and handling conditions, please refer to the label and/or leaflet. In all other cases the following recommendations would apply.

Respiratory Protection

Respiratory protection should only be used to control residual risk or short duration activities, when all reasonably practicable steps have been taken to reduce exposure at source e.g., containment and/or local extract ventilation.

Always follow respirator manufacturer's instructions regarding wearing and maintenance. Wear respirator with a particle filter mask (protection factor 20) conforming to European Norm EN149FFP3 or EN140P3 or equivalent.

Unlocking Australia's Soil Potential

Bio-Nema-Key+

8. EXPOSURE CONTROLS/PERSONAL PROTECTION (CONTINUED):

Thermal Hazards

Not applicable

Control Banding Approach

No data available

Environmental Exposure Controls

No data available

9. PHYSICAL AND CHEMICAL PROPERTIES AND SAFETY CHARACTERISTICS:

Physical state:	Solid
Appearance:	Brown powdery substance
Colour:	Light Brown
Odour:	Sweet earthy
Odour threshold:	No data available
pH:	5.2 – 5.4 (100%) (23oC)
Melting point/freezing point:	0°C
Boiling point or initial boiling point and boiling range:	91°C
Flash point:	No flash point
Evaporation rate:	No data available
Flammability:	>91°C, No flash point
Lower and upper explosion limit/flammability limit:	No data available

Unlocking Australia's Soil Potential

Bio-Nema-Key+

9. PHYSICAL AND CHEMICAL PROPERTIES AND SAFETY CHARACTERISTICS (CONTINUED):

Vapor pressure:	No data available
Relative vapor density:	No data available
Density and/or relative density:	ca. 1.05 g/cm ³ (20°C)
Solubility:	Soluble in water
Partition coefficient n-octanol/water (log value)	Not applicable
Auto-ignition temperature:	No oxidising properties
Decomposition temperature:	No information available on product
Kinematic viscosity:	N/A
Explosive properties:	Not explosive 92/69/EEC, A.14 / OECD 113
Oxidising properties:	No oxidising properties

Particle Characteristics

Not applicable

Further Safety Characteristics (Supplemental)

Not known

10. STABILITY AND REACTIVITY:

Reactivity

Thermal decomposition. Stable under normal conditions.

Chemical Stability

Stable under recommended storage conditions.

Unlocking Australia's Soil Potential

Bio-Nema-Key+

10. STABILITY AND REACTIVITY (CONTINUED):

Possibility of Hazardous Reactions

No hazardous reactions when stored and handled according to prescribed instructions.

Conditions to Avoid

Freezing, extreme temperature and direct sunlight.

Incompatible Materials

Store only in the original container.

Hazardous Decomposition Products

No decomposition products expected under normal conditions of use.

11. TOXICOLOGICAL INFORMATION:

Information on Toxicological Effects:

Acute Toxicity

Non-toxic

Skin Corrosion/Irritation

Based on available data, classification data are not met.

Serious Eye Damage/Irritation

No known significant effects or critical hazards. May cause irritation due to mechanical action.

Unlocking Australia's Soil Potential

Bio-Nema-Key+

11. TOXICOLOGICAL INFORMATION (CONTINUED):

Respiratory or Skin Sensitization

Based on available data, classification criteria are not met.

Germ Cell Mutagenicity

Based on available data, classification criteria are not met.

Carcinogenicity

Did not cause specific target organ toxicity in experimental animal studies.

Reproductive toxicity

Test not required for microorganisms.

Summary of evaluation of the CMR properties

Test not required for microorganisms.

STOT-single exposure

Based on available data, classification data are not met.

STOT-repeated exposure

Based on available data, classification data are not met.

Aspiration hazard

Based on available data, classification data are not met.

Unlocking Australia's Soil Potential

Bio-Nema-Key+

12. ECOLOGICAL INFORMATION:

Toxicity

A natural occurring consortium of soil bacteria. Produces cytolytic enzymes, proteases, and other enzymes that degrade a variety of natural substrates and contribute to nutrient recycling.

Persistence and Degradability

According to OECD method 302B, this product is classified as inherently biodegradable and therefore unlikely to persist in the environment.

Bio Accumulative Potential

According to OECD method 302B, this product is classified as inherently biodegradable and therefore unlikely to persist in the environment.

Mobility in Soil

Due to water solubility, mobile in soil.

Results of PBT and vPvB Assessment

PBT/vPvB assessment not available as chemical safety assessment not required/not concluded.

Endocrine Disrupting Properties

Is a naturally occurring soil bacteria.

Unlocking Australia's Soil Potential

Bio-Nema-Key+

13. DISPOSABLE CONSIDERATIONS:

Disposable Methods:

Product Disposal

In accordance with current regulations and, if necessary, after consultation with the site operator and/or with the responsible authority, the product may be taken to a waste disposal site or incineration plant. Advice may be obtained from the local waste regulation authority.

Packaging Disposal

Small containers (<10 L or <10 kg) should be rinsed thoroughly using an integrated pressure rinsing device, or, by manually rinsing three times. Add washings to sprayer at time of filling. Dispose of empty and cleaned packaging safely. Follow advice on product and/or leaflet.

Waste Treatment

Dispose according to local authority regulations and rules.

Sewage Disposal

Dispose according to local authority regulations and rules.

14. TRANSPORT INFORMATION:

UN Number:	None
UN Proper Shipping Name:	None
Transport Hazard Class(es):	None
Packing Group:	None
Environmental Hazards:	None
Special Precautions for User:	None
Transport in bulk according to IMO instruments:	None

Unlocking Australia's Soil Potential

15. REGULATORY INFORMATION:

Chemical Safety Assessment

A chemical safety assessment is not required for this product.

HMIS Rating

Bio-Nema-Key+	
HEALTH	0
FLAMMABILITY	0
PHYSICAL HAZARD	0
PERSONAL PROTECTION	B

NFPA Rating

16. OTHER INFORMATION:

We support worldwide Responsible Care initiatives. We value the health and safety of our employees, customers, suppliers and neighbours, and the protection of the environment. Our commitment to Responsible Care is integral to conducting our business and operating our facilities in a safe and environmentally responsible fashion, and minimising the impact of our operations on society and the environment during production, storage, transport, use and disposal of our products.
